

At the heart of the QA451 is the Triple deck Doublescreen box, featuring two independent triple deck screen boxes. Both feature independent drives and can have their amplitudes and combined screen angles adjusted dependant upon application. The QA451 offers a screening solution no other mobile triple deck screener can provide as its two screen boxes offer an unsurpassed level of separation on a wide range of materials, at very high rates of production.

- 1 First screen box is used as a fines extractor
- 2 The majority of the undersize is removed during initial impact
- 3 Second screen box operates as a grader
- 4 Clean gradings, at very high output, are produced as material is exposed to a very large screening area

TECHNICAL SPECIFICATIONS

KEY SPECIFICATIONS	DATA	KEY SPECIFICATIONS	DATA
Screen type	2 off screenboxes, 2 Bearing 3 Deck	Power pack	
Screen box size	20' x 5' / 6 x 1.5 m	Engine	CAT C4.4 74.5 kw / 100 hp
Tensioning system	Manual Ratchet	Diesel tank size	290 litres / 76.5 USG
Speed	1200 rpm	Hydraulic tank size	370 litres / 98 USG
Throw	7.7 mm	Note. All weights and dimensions are for standard units only	
Motor	49 cc x 2 off		

Standard weight 34,000 kg / 74,957 lbs

Transport dimensions	18.37 m / 60' 3" (l) 3.20 m / 10' 6" (w) 3.55 m / 11' 8" (h)
Weight	34,000 kg / 74,957 lbs

ULTIMATE SCREENING SOLUTION

The QA451 is the largest and most impressive mobile tracked screener in the Premium range and the only screener in the world with a triple decked Doublescreen screening system. Building upon the success of the QA450, the QA451 represents the next generation model with numerous product enhancements to produce a more user-friendly, efficient and productive unit.

The QA451 is designed specifically to work in closed circuit with our tracked secondary and tertiary crushers. The hydraulically folding fourth product conveyor slews and raises/lowers hydraulically to optimise the feeding position to these upstream units. Alternatively, the QA451 can work as an extra-large stand-alone screening and stockpiling system producing four sized products with a fifth oversize material scalped off at the grid.

FEATURES INCLUDE:

- High production capabilities due to its phenomenal Doublescreen system - two in-line, independently vibrating 10' x 5' / 3 x 1.5 m triple deck screenboxes
- Four on-board hydraulic folding stockpilers
- Enlarged oversize conveyor chute prevents bottle necks and ensures free flow of material.
- Large volume hopper complete with remote control hydraulic tipping grid
- Fully compliant with the latest safety regulations
- Capable of working in the most hostile of environments
- Designed for optimum fuel economy and low operating costs.

STANDARD FEATURES

Hydraulic slew and raise / lower facility

Remote control for ease of mobility

Patented triple deck Doublescreen technology

Colour coded control panel for ease of operation

Hydraulically folding walkways for ease of maintenance

Massive stockpiling capabilities
